

Backplate Silent Single Coil System (BPSSC)

Get Great Vintage
Single Coil Tone
Without the Noise!

***Install the BPSSC on Your Single-Coil
Equipped Guitar and Kill the Hum!***

Everyone loves the sound of the pure single-coil pickup, but the 60-cycle hum that it generates has been an annoyance that musicians have had to deal with for over 50 years or not deal with at all and use humbucker pickups or settle for tonal compromises like stacked single-coils, dummy coils, and active electronics. Those days are now over with the Suhr/Ilitch Electronics SSC System. Originally only available as a built-in system on our Classic guitars, the SSC is now available in a backplate that covers the tremolo spring cavity and that means you can now enjoy the benefits of this breakthrough technology on non-Suhr guitars with "pure" single-coil pickups.

The BPSSC System eliminates the noise while completely retaining the sonic character of pure single-coil pickups. The noise is gone but the sparkle, the chime, and the low-end response that you've come to love in single-coil pickups are all still there for you to enjoy and savor. The BPSSC System is easy to install and does not need any additional modifications to your guitar. Remove the current

backplate on your guitar, solder the wires coming out of the BPSSC with the electronics on your guitar following the included instructions, screw the BPSSC on the back of your guitar and you're ready for great pure single-coil tone without the noise!

Finally, after over 50 years, you can get true single-coil sound without the noise. Many single-coil lovers had resigned to the fact that noise was a "necessary" artifact that couldn't be eliminated without compromising the tone. The BPSSC System proves that it is possible to get great single-coil sounds without the annoying hum – once and for all!

The BPSSC System is available in the following colors: Black Satin, White/Black/White 3-ply, Parchment 3-ply, and Tortoise Shell. The BPSSC System has a suggested retail price of \$325. Contact your authorized Suhr dealer or your favorite music store to enquire about the BPSSC System and get rid of the noise!
